Thank You Las Vegas!!!

Hello

With 2 big shows down, and a lot more to go, we wanted to thank all those who came out to see us for TISE and WOC in Las Vegas.

Here are a few highlights:

Congratulations to the first ever 3-Time Specmix Bricklayer 500 World Champions, Fred Campbell (Mason) & Tony Shelton (Tender) from Creative Masonry, Greeneville, TN.

Vince Hollis (National Training Manager) presented them with a new iQMS362 and blades, to add to their iQ Power Tools collection.

Click here for more WOC 2020 updates.

During TISE 2020 we unveiled our latest addition to the saw lineup, the iQ228CYCLONE 7" Dry Cut Bench Top Tile Saw, and the response was more than we could ever hope for.

Stay tuned for more details coming this fall.

Paul Guth (iQ CEO) Showcasing the iQ228Cyclone

New Blog

Reverse Air Flow vs iQ Quickspin

With the recent launch of the iQ426HEPA Cyclonic Dust Extractor, the entire iQ team had to do a deep dive into researching the existing dust extractors on the market, their features, benefits, and downsides.

In our latest blog we take a look at which HEPA filter cleaning method is most effective. With a closer look at the iQ426HEPA's trap door mechanism, we examine 3 methods:

- iQ Quickspin
- Reverse Air Flow
- Filter Shaker

You won't be surprised who wins this battle, but you WILL BE surprised as to why the other 2 methods fail in the long run.

iQ TIPS & TRICKS

Spring Cleaning: Landscape / hardscape season is upon us, and we know that a lot of you will be pulling out your iQ360XR and iQMS362 saws out to get to work.

So we thought we'd share this spring cleaning tip:

DO NOT, we repeat, DO NOT use water to clean your dry-cut masonry saws. The best way to clean your saw is by using a dry method like vacuuming them off with a brush attachment and/or using an air compressor (while protecting yourself with a mask on).

Just remember the "No Water", in "No Dust, No Water, No Problem".

Happy Spring!

About iQ Power Tools

iQ® Power Tools was founded by third generation masons Joel and Paul Guth. We owned and operated successful masonry companies for over 30 years, at times with over 100 employees. Decades of experience taught us about dust problems. It makes a huge mess, it costs a great deal of money, and it's a threat to the health and safety of our industry. We started out building tools to solve our own dust problems, but we realized these problems were affecting all contractors, so we started iQ Power Tools. Today we build smart, tough power tools that eliminate the dust problem. Using iQ®, contractors can clean-cut materials with virtually no dust. For more information, please visit www.iqpowertools.com.
